

Supplies & Equipment List

You do not need a fully outfitted kitchen to start. Buy the first two categories now; add the rest as the modules call for them. Quality where it counts: a good chef's knife, a heavy skillet, an instant-read thermometer, and a scale will outperform a drawer full of gadgets.

Tip: a single sharp 8-inch chef's knife, one cutting board, one stainless skillet, one saucepan, a sheet pan, a thermometer, and a scale are enough to complete the first six modules.
